3 Non-Display Information Usage

The non-display license fees for the individual categories of each Non-Display Information usage are to be paid additively depending on the respective usage.

Boerse Stuttgart has defined the following categories for Non-Display Information usage:

1. Trading activity

The category trading activity covers all Non-Display Information usage related to the trading business. Trading activity thus includes semi-automatic or automatic order and quote generation, pricing, order pegging, the use of the information as a reference price for trading purposes, smart order routing, order management, execution management, market making, the "black box" trading, algorithmic trading, as well as program trading and the operation of a trading platform.

For the category trading activity it is irrelevant whether the counterparty of Boerse Stuttgart operates own or foreign trade, broker or agent and / or operates a trading platform.

2. Index calculation

The category index calculation includes the use of real-time information for the purpose of calculating one or more indexes that are redistributed either internally or externally. The calculation of key figures such as the NAV or iNAV does not fall under the category index calculation.

3. Non-Display Information usage in other applications

The Non-Display Information usage category in other applications includes use for purposes other than trading activities and / or index calculation, e.g. Risk management, profit-loss calculations, portfolio valuation, quantitative analyzes, fund administration, portfolio management.
