

BISON introduces securities trading

Alongside the most popular cryptocurrencies, BISON now offers over 2,500 stocks and ETFs through fully regulated securities trading

Stuttgart, March 17th, 2023 – [BISON](https://bisonapp.com), the crypto trading app for retail customers of Boerse Stuttgart Group, is partnering with Sutor Bank and JT Technologies GmbH to introduce securities trading. With this new feature, BISON enables its customers to invest in both cryptocurrencies and traditional securities within a single app – all while maintaining the app's familiar safety, simplicity, and affordability.

In offering securities trading to its customers, BISON provides them with access to over 2,500 stocks and ETFs. With this expansion, safety, reliability, and transparency remain BISON's top priorities. The decision to add securities trading came in response to strong demand from existing customers, who wanted to be able to trade both cryptocurrencies and traditional securities within the same app. "By introducing securities trading on BISON, we're making it easy for our customers to diversify their portfolios within a single app. Access to a wide range of asset classes opens up diverse investment opportunities for different market phases. To further empower its customers, BISON plans to continue expanding its offering in the digital asset space in the future," said Dr. Ulli Spankowski, CEO and Co-Founder of BISON. "We're thrilled to have had the opportunity to showcase our B2B expertise by partnering with Sutor Bank for this BISON offering," added Michael B. Bußhaus, Managing Director and Co-Founder of JT Technologies GmbH.

In expanding its asset classes, BISON draws on the long-standing experience and expertise of Boerse Stuttgart Group in securities trading. With an order commission of 1.99 euros per transaction, BISON offers relatively low costs, and there are no additional trading venue fees. Similar to cryptocurrencies, securities are available to users on BISON at any time and can be transferred free of charge.

Initially, securities trading is available in BISON's mobile app in Germany, for German citizens, from Monday to Friday between 8:00 a.m. and 10:00 p.m. (excluding some holidays). Customers can activate the securities trading feature in the app whenever they choose, with buy orders for securities available up to an amount of 100,000 euros per transaction and no limit on the number of orders per day. Sell orders are possible without any restrictions. Additional features, such as different order types, securities savings plans, and a desktop version, are in planning. Buy and sell orders for securities on BISON are executed on a regulated trading platform of Boerse Stuttgart Group.

About BISON

[BISON](#) is the trading platform for retail customers of Boerse Stuttgart Group and, as such, is a reliable partner for trading cryptocurrencies and securities. With its "Made in Germany" foundation and support from a traditional securities exchange, BISON provides a safe and trustworthy platform for all its users' trading needs. Based in Germany and with an international team of experts working from Austria, Slovenia, Switzerland, and Italy, BISON has over 700,000 active users and is available to individuals across 72 nations.
